

Plantation Softball Association

Covid-19 recommendations for safe League softball play;

For this to work we are depending on the players and fans to abide by the recommendations set forth. We do not have the authority to impose any penalties on players or fans but if we feel their conduct puts our community at risk it will then be necessary to close our field to outside communities.

Plantation will provide hand sanitizers and wipes in the dugouts and other designated areas for fans. Water coolers will be shut off and it is recommended that every player and fan carry some form of hydration. Bottled water will be available for emergencies. The dugouts will be open along the left and right field lines, and an area will be roped off for players "only" to create as much safe distancing as possible. The bleachers will be open for fans, and masks and safe distancing is recommended. Our snack bar will be closed until we can provide a safe environment for our residents and guests. A digital thermal thermometer is not an expensive tool to own and we recommend managers to check their team before entering our community. A temperature of less than 100.4 is the government standard.
